209. Minimum Size Subarray Sum

题目描述: <u>https://leetcode.com/problems/minimum-size-subarray-</u>sum/

给定一个非负数组num,和一个非负整数s,求num中最小的可以满足加和>=s的长度。例如:

```
nums = [2,3,1,2,4,3] and s = 7
由于[4,3] >= 7 所以返回 len = 2
return 2
```

解题思路:

采用两个指针, 依次累加, 如果加和>=s,则设置为 min(minlen, nowlen)向后移动第一个指针, 如果小于s,则向后移动第二个指针。

代码:

```
class Solution {
public:
    int minSubArrayLen(int s, vector<int>& nums) {
        int start = 0, sum = 0, minlen = nums.size()+1;
        for(int i = 0; i < nums.size(); i++){
            sum+=nums[i];
        while(sum >= s){
            minlen = min(minlen, i-start+1);
            sum = sum - nums[start++];
        }
    }
    return minlen>nums.size()?0:minlen;
}
```
